

Registration is now open for the [30th Clinical Update in Geriatric Medicine](#), jointly provided by the Pennsylvania Geriatrics - Western Division, UPMC/ University of Pittsburgh Institute on Aging, and University of Pittsburgh School of Medicine Center for Continuing Education in the Health Sciences.

Although it will again be in a virtual format, the goal is unchanged: to help you provide superb care to your older patients by ensuring that each lecture, symposium, and breakout session provides evidence-based “pearls” that **you can incorporate immediately into your practice**.

**In addition to involving nationally renowned experts, this award-winning course** is delivered by highly regarded clinician-educators and clinician-researchers who have *both* the experience with these approaches *and* the ability to teach them effectively.

### Course Highlights Include:

- Pragmatic clinical pearls on challenges that primary care clinicians face daily in the care of older adults, including behavioral symptoms of dementia, dizziness, urinary tract infections, and polypharmacy
- New, proven strategies for aligning care with the specific priorities and goals of older adults coping with multiple health conditions -- delivered by the renowned expert who devised and tested them
- Exploration of aging’s impact on cardiovascular function, dysfunction, and falls, delivered by the pioneer in the field
- A Geriatric Cardiology Symposium featuring authors of AHA/ACC’s national Guidelines for the Elderly
- Interactive expert Q/A sessions on osteoporosis by the President of the National Osteoporosis Foundation; and urinary incontinence by the co-developer of the AHRQ, MDS, and WHO guidelines
- Guidance on real-world decision-making for management of chronic pain in older adults, presented by an innovative leader in Geriatric Pain Medicine
- Practical tips on Palliative Medicine by the co-developer of the widely acclaimed “VitalTalk” approach
- Update on management of acute and long-term effects of COVID-19 in older adults
- State of the art models focused on emergency department care through a geriatric lens
- Evidence-based solutions for multiple other relevant topics specific to the geriatric population, delivered by specialists in Infectious Diseases, Endocrinology, and Gastroenterology

Take advantage of the Early registration discount (through February 28<sup>th</sup>) .
